# The Power Placer® Program

Recruiting and training Utilization Management and Case Management nurses can be difficult in today's competitive market. MEDISYS, Inc.'s Power Placer® Program gives healthcare providers the advantage through careful screening and supervised training. The result is a highly skilled staff without the disruption of providing your own in-house training.

## What We Do

Power Placer® is an innovative training program developed by MEDISYS to help nurses move from direct patient care into the fields of Utilization Management and Case Management. Nurses train on site in a hospital or managed care setting under the supervision of an experienced preceptor, receiving a training pay rate until they achieve program goals.

## How It Works

The Power Placer® Program involves five steps:

- Identification and screening of candidates
- Theoretical training through an online program
- On-site training under the supervision of a MEDISYS preceptor
- Competency evaluation at the end of the training period
- Graduation to independent work as a Utilization or Case Management professional

## Get the Power Placer® Advantage

Power Placer® clients benefit from:

- Training that meets today's regulated healthcare environment
- Staff who are ready to work from day one
- On-site MEDISYS preceptor to supervise trainees
- Less time spent by existing staff in training new employees
- Vacancies filled with minimum of disruption
- New employees with new energy

## Who We Are

Medisys, Inc. provides professional supplemental staffing services in all areas of medical management. Our proven track record and established customer base demonstrate our commitment to our clients' goals. Find out how to give your organization the Power Placer® advantage.
