Power Placer
An Innovative Training
Program For Nurses

The Power Placer[®] Program

WHO: Medisys, Inc. provides professional supplemental staffing services in all areas of medical management. Our proven track record and established client base can assure you of our commitment to you and your career goals.

WHAT: Power Placer[®] is an innovative training program developed by MEDISYS to help nurses who wish to move out of direct patient care and

into the fields of Utilization Management and Case Management. Nurses who participate in this program are paid a training rate until they learn enough about the new job to be independent in their work. Some of our nurse “superstars” have come up to speed in as little as four weeks. At that time, nurses may receive a rate increase. Nurses in this program are also eligible for health insurance.

WHERE: Power Placer[®] Program has been offered at several insurance companies and hospitals.

WHEN: Training sessions are offered based on client’s needs.

WHY: As many nurses have discovered, the majority of organizations today are too busy to train nurses in these skills. Power Placer[®] Program provides the support of an experienced on-site preceptor for the nurses in training to help orient them to the new setting. From the first week, the nurses are productive members

of the staff learning the job they may eventually be hired to do permanently.

Here is what one of the nurses in the program, Tess Angeles, RN, BSN, has to say about it:

“Power Placer[®] is a wonderful concept that helps nurses with varied clinical backgrounds gain experience in another aspect of healthcare, utilization review management, and be trained in an actual setting with the opportunity to be hired as a full-time employee. The program is fast-paced, with high expectations for us to achieve goals, but rewarding, not boring.”

For more information on the opportunity known as Power Placer[®], please contact our office at **1-888-275-9598.**

The MEDISYS nurses who have successfully completed the Power Placer[®] Program have recognized this as a “once in a career opportunity.”
